Professional Summary

Enthusiastic and detail-oriented engineering graduate with a solid background in full stack development with Java and current web technologies. Passionate in learning new skills and providing high-quality solutions. Seeking an opportunity to contribute to the growth of an organization while also expanding my technical knowledge and professional development.

Education

**B.E. – Electronics and Communication Engineering,
Adhiparasakthi College of Engineering, Anna University, RANIPET**

2025

HSC, A.C.S Metric Higher Secondary School, Arni

2020

SSLC, Government Higher Secondary School

2018

Courses

Java Full Stack Development, QSpiders

12/2024 - Present

Projects

AI-Powered Fire Detection System using ESP32-CAM - [Link](#)

Esp32-cam, Firebase, Thunkable, Deepstack Server

Created a real-time fire alarm system with the ESP32-CAM module and FireNet machine learning model for detecting fires. Incorporated DeepStack server for image processing, Firebase as IoT and real-time database, and a Thunkable mobile app for surveillance.

Weather App – [Live Demo](#) | [Link](#)

HTML, CSS, JS, OpenWeather API

Created a weather application that fetches current weather and forecast data from the OpenWeather API dynamically.

Personal Portfolio – [Live Demo](#) | [Link](#)

React.js

Developed a responsive portfolio website using React.js to showcase projects, skills, and contact information. Implemented routing with React Router, form handling for inquiries.

Employee Record Management System - [Link](#) (In Progress)

React.js, Spring Boot (REST API), MySQL

Developing a complete stack employee management application using React.js as the frontend and Spring Boot as the backend offering REST APIs. Supports CRUD operations on employee records and employs MySQL as the database

Technical Skills

Java (Core Java):

- Strong understanding of OOP principles such as encapsulation, abstraction, polymorphism, and inheritance
- Strong knowledge of constructors, interfaces, overriding, and overloading methods
- Knowledge of upcasting and downcasting, wrapper classes, and string handling
- Strong familiarity with the Exception Handling, Collection Framework (List, Set, Queue) and Map Hierarchy
- Practical knowledge of file I/O operations
Understanding the fundamentals of thread management and multithreading
- Familiarity with the Stream API and Lambda Expressions for functional programming

Oracle SQL:

- Good understanding of RDBMS concepts like Constraints, Normalization, Tables, and Keys
- Hands-on experience with DDL, DML, TCL, DCL and DQL queries
- Strong in Joins (Inner, Left, Right, Full), Group functions, Subqueries, and Clauses

Web Technologies:

- **HTML5:** Forms, Tables, and Semantic Elements
- **CSS3:** Selectors, Flexbox, Box Model, and Fundamentals of Responsive Design basics
- **JavaScript (ES6+):** Variables, Functions, Classes, Template Literals, Arrow Functions, Destructuring, Spread & Rest Operators, and Modules

React.JS:

- Good comprehension of Components, Props, and State Management for creating interactive user interfaces
- Familiarity with React Hooks such as useState, useEffect, useRef, and useContext for handling state, side effects, references, and global context
- Familiarity with React Router for client-side routing and page navigation
- Knowledge of Form Handling and Validation to accurately capture and validate user input

J2EE:

- Good understanding of JDBC for database connection of Java applications and query execution
- Knowledge of Servlets for processing HTTP requests and responses
- Background with JSP (JavaServer Pages) for dynamic web content construction
- Understanding of Hibernate ORM for Java object mapping to relational tables
- Familiarity with JPA (Java Persistence API) for relational data management in Java applications
- Familiarity with the basics of Spring Boot for building RESTful APIs
